

Product Suite

Infoglide Software Corporation's Bladeworks™ technology is the only configurable, plug-and-play solution that searches, analyzes, and operates on transactional and historical data in real-time across remote, disparate databases. Bladeworks can be configured to meet your company's unique needs. Our suite offers solutions that make Bladeworks a smart choice for enterprise risk management, automated fraud detection, enterprise identity management, transactional CRM, compliance, and enhanced data mining and data connectivity.

Bladeworks™ CS

Bladeworks CS is a fully configured solution designed to address specific business applications. Easier and faster to implement than the full enterprise solution, Bladeworks CS solves critical business problems and is delivered complete with hardware, software, service, support, and training. This plug-and-play solution incorporates all the advantages of Bladeworks software and is delivered fully operational so the customer can begin to see results immediately.

Bladeworks CS includes one or multiple applications, professional services, a comprehensive warranty, technical support, reports, in-version upgrades, and multiple user licenses. Data Solutions & Services (DSS)

data packages are easily incorporated in the package. The hardware includes dual Intel or AMD Opteron processors with 64-bit operation and either a Windows or Linux operating system. Bladeworks CS can be up and running in less than six weeks from order placement and requires minimal support from the customer's internal IT department.

Bladeworks™ ES

Bladeworks ES delivers Bladeworks' innovative software technology for organizations with sizeable or multiple enterprise applications. This enterprise software includes

professional services, reports, a comprehensive warranty, technical support, and in-version upgrades. Data Solutions & Services (DSS) packages are easily incorporated in the package.

Bladeworks™ TS

Bladeworks TS delivers Bladeworks innovative software and Data Solutions & Services (DSS) data packages on a per transaction basis. Bladeworks TS is accessed via the Internet. The package

includes technical support and a customized user interface. Customers have the option of having Bladeworks TS hosted at Infoglide Software or at their own location. When hosted at Infoglide Software, Bladeworks TS requires no support from the customer's internal IT department.
